### **DETAILED ACTION**

Claims 1-59 are pending.

#### ***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-30, drawn to a process for treatment of a condition comprising applying a composition, classified in class 514, subclass 2.
  - II. Claims 31-59, drawn to a composition and process for the manufacture of the composition, classified in class 514, subclass 2.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as process of use and product. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case a process for the treatment of conditions that include seborrhea can be practiced with a materially different product. For example, a variety of antiseborrheic shampoos are currently available such as Sebex® which comprises 2% sulfur and 2% salicylic acid.
3. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Art Unit: 1619

4. The claims are generic to a plurality of disclosed patentably distinct species comprising Formula I. Applicant is required under 35 U.S.C. 121 to elect a single species of Formula I, even though this requirement is traversed.

Applicant is advised that a response to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. By species is meant a single compound. The compound may be identified 1) according to IUPAC standard, 2) by a pictorial representation, 3) by setting forth a specific chemical group for each variable of the formula, or 4) by naming a claim or example which itself sets forth a single compound.

Should applicant traverse on the ground that the species of Formula I are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention (I or II) and election of species of Formula I, even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one

Art Unit: 1619

or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael A. Willis whose telephone number is (703) 305-1679. The examiner can normally be reached on Mon. to Fri. from 9 a.m. to 5:30 p.m.
